

WATCHGUARD APPLICATION CONTROL IS A FULLY INTEGRATED SECURITY SUBSCRIPTION FOR ALL WATCHGUARD XTM APPLIANCES.

It enables IT administrators to monitor and control access to web and business applications to enforce policy, and protect productivity and network bandwidth.

WHY ADD THIS SUBSCRIPTION TO YOUR XTM SOLUTION?

WatchGuard Application Control tightens security across your extended network and adds productivity safeguards that go straight to the corporate bottom line. And because Application Control is integrated with the XTM appliance, you'll have another powerful layer of defense in a single cost-effective solution – with no additional hardware to buy. Bundle it with the complete suite of XTM security subscriptions for even greater savings and comprehensive protection.

Below are just a few of the apps that IT can manage with a subscription to WatchGuard Application Control.

WatchGuard Application Control

AN INTEGRATED SECURITY SUBSCRIPTION FOR WATCHGUARD® XTM SERIES APPLIANCES*

Application Control keeps unproductive, inappropriate, and dangerous applications off-limits. Stay on top of the applications running on your network for tight security and high productivity with a subscription to WatchGuard Application Control. It allows you to establish which applications can be used within your organization, by whom, and when.

- Exercise fine-grained control over more than 1,800 applications, organized by category.
- Rely on over 2,500 signatures and sophisticated behavioral analysis to identify applications trying to enter your network, regardless of destination address or L7 protocol, including encrypted applications that are specifically designed to bypass ordinary security measures.
- Establish acceptable use policies for users and groups by category, application, and application sub-function for maximum flexibility.
- Take advantage of real-time and historical visibility into what's being accessed on your network to report on application usage. Use the information to demonstrate compliance, evaluate employee need, and refine acceptable use policies.

APPLICATION CONTROL IN ACTION

With Application Control, you can selectively allow, block, or restrict access to applications based on a user's department, job function, and time of day, and generate reports on usage. For example, you could choose to:

- Block use of YouTube, Skype, and QQ at all times, during key business hours, or never
- Block use of all P2P applications for anyone who is not part of the management team
- Allow only the marketing department access to Facebook and other social networking sites
- Allow Windows Live Messenger for instant messaging, but disallow using it for file transfers
- Limit streaming media applications to specific times of day
- Report on the top 10 applications used in the company
- Report on the use (or attempted use) of applications by any individual in the company

CONTROL AND BLOCK MORE THAN 1,800 WEB 2.0 AND BUSINESS APPLICATIONS

The screenshot shows the WatchGuard Firewall XTM Web UI. The user is logged in as 'admin'. The 'Application Control' section is active, showing settings for a policy named 'Mkt_policy' with the description 'Allow marketing access to FB'. The 'Show all applications' option is selected. The 'Category' is set to 'All' and the search filter is 'facebook'. A table lists various Facebook-related applications and their configured actions.

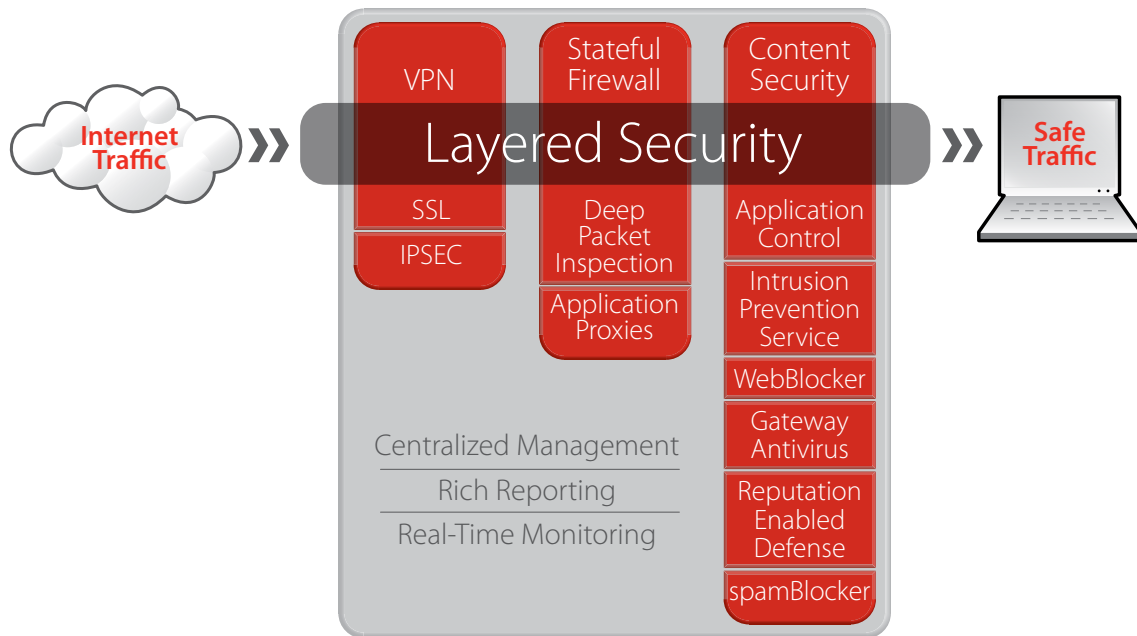

Category	Application	Behavior	Action
Social Network	Facebook	Access, Authority	Allow
Social Network	Facebook Applications	Access	Drop
Social Network	Facebook EditProfile	Access	Drop
Social Network	Facebook Game	Access	Drop
Social Network	Facebook Picture	Transfer	Drop
Social Network	Facebook Plug-in	Access	Drop
Social Network	Facebook Post	Access	Drop
Social Network	Facebook Video	Transfer	Drop
Web IM	Facebook Web IM	Communicate	Drop

When application does not match: **Allow connection** (dropdown menu)

Buttons: Clear Action, Edit, Save, Cancel

*Application Control is not available for Firebox® X e-Series appliances.

WatchGuard Extensible Threat Management

MANAGING SECURITY SUBSCRIPTIONS IS EASY

All security functionality on your WatchGuard XTM solution, including Reputation Enabled Defense, can be managed from a single intuitive console for maximum efficiency and ease of use.

- Security activity identified by a service is logged and stored for easy reporting so you can take immediate preventive or corrective action.
- All management tools, including rich reporting and monitoring, are included with your WatchGuard appliance purchase. There is no additional hardware or software to buy.

OTHER WATCHGUARD SECURITY SUBSCRIPTIONS

WatchGuard offers a full suite of security services to boost protection in critical attack areas. Besides Application Control, subscriptions include:

- **Reputation Enabled Defense*** is a powerful cloud-based URL reputation lookup that protects web users from malicious web pages, while dramatically improving web processing throughput.
- **WebBlocker** URL and content filtering, with HTTP and HTTPS inspection, allows you to control access to sites that host objectionable material or pose network security risks.
- **spamBlocker** blocks nearly 100% of unwanted email in real time before it can reach your internal mail server or client.
- **Gateway AntiVirus** provides real-time protection against known viruses, trojans, worms, spyware, and rogueware.
- **Intrusion Prevention Service** provides protection from attacks that comply with protocol standards but carry malicious content.

BUY THE BUNDLE AND GET THE WORKS

Get everything you need for complete threat management in one convenient package with a Security Bundle from WatchGuard. Each Bundle includes:
