

# Gateway AntiVirus

An integrated security subscription for WatchGuard® XTM appliances

## Gateway AntiVirus Is the First Line of Defense

Gateway AntiVirus (Gateway AV) works in tandem with the application layer content inspection of the WatchGuard XTM solution to provide real-time protection against known viruses, trojans, worms, spyware, and rogueware.

### Why add a Gateway AV subscription?

Gateway AV scans traffic on all major protocols, using continually updated signatures to detect and block all types of malware.

Running this anti-virus solution at the gateway puts another layer of protection in front of other anti-virus products running on desktops and servers for even greater defense in-depth.

### Viruses, worms, and trojans are stopped at the gateway

- Scans all major protocols, including HTTP, HTTPS, FTP, TCP, UDP, SMTP, and POP3 to block all types of malware.
- Email traffic is scanned at the gateway to stop threats before they gain access to your servers and execute their dangerous payloads.
- Suspect email can be flagged to go into quarantine, where administrator can restrict access or allow users to review quarantined files through automatic email alerts.
- Provides safer web browsing by preventing the download and execution of malicious code.

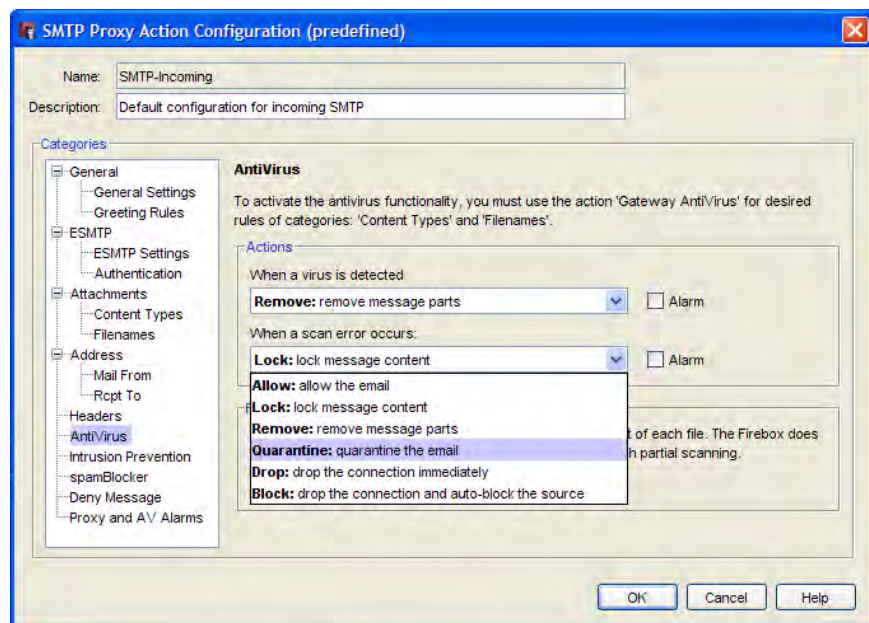

### Highly effective scanning

- Incorporates highly rated scanning engine from industry-leader AVG Technologies.\*
- Signature database can be configured to check for updates hourly, ensuring timely, far-reaching coverage.
- Dynamic heuristic analysis uses code emulation to identify polymorphic viruses and dangerous code that signatures can't catch.
- Compressed and encoded files are decompressed for inspection, with wide compression support including .zip, .gzip, .tar, .jar, .rar, .chm, .lha, .pdf, XML/HTML container, OLE container (Microsoft Office documents), .cab, .arj, .ace, .bz2 (Bzip), .swf.
- Buffered scanning process ensures optimum performance for in-line HTTP scanning.

### Cost-effective virus scanning

- Provide network-wide protection for all users configured behind your WatchGuard XTM firewall with a single Gateway AV subscription.
- Purchase Gateway AV bundled with our suite of powerful security subscriptions for even greater savings.

**It's easy to boost protection where you need it most – at the gateway – by adding a subscription for Gateway AntiVirus.**

\*Independent lab testing found AVG to have greater than 90% reactive detection rate (Virus Bulletin RAP test results: Feb-Aug 09 [www.virusbntn.com](http://www.virusbntn.com))

## Fully Integrated Security for Comprehensive Protection

### All-in-One Security Solution

WatchGuard XTM appliances combine with powerful security subscriptions to offer comprehensive protection from malware. All security capabilities are managed from one intuitive console, with centralized logging and reporting features for an up-to-the-minute view of network security activity.

Because the threat landscape is always changing, WatchGuard XTM solutions are designed to be able to easily add new network defense capabilities through security subscriptions, so costly hardware upgrades are not necessary.

### Managing Security Subscriptions Is Easy

All security functionality on your WatchGuard XTM solution, including Gateway AntiVirus, can be managed from a single intuitive console for maximum efficiency and ease of use.

- Any security activity identified by Gateway AV is logged and stored for easy reporting so you can take immediate preventive or corrective action
- IT Administrators have the flexibility to define the action to be taken when malware is identified – enabling the network to allow, block, quarantine, or lock questionable traffic based on type, user/group, and protocol
- All management tools, including rich reporting and monitoring, are included with your WatchGuard XTM appliance purchase. There is no additional hardware or software to buy

### Other WatchGuard Security Subscriptions

WatchGuard offers a full suite of security services to boost protection in critical attack areas. Along with Gateway AntiVirus, subscriptions include:

- **WebBlocker** URL and content filtering, with HTTP and HTTPS inspection, allows you to control access to sites that host objectionable material or pose network security risks, including known spyware and phishing sites.
- **spamBlocker** blocks nearly 100% of unwanted email in real time before it can reach your internal mail server or client. Delivers an addition layer of virus outbreak protection for your network and includes full-featured spam quarantine.
- **Intrusion Prevention Service**, with over 15,000 signatures, provides in-line protection from attacks that comply with protocol standards but carry malicious threats.

### Buy the Bundle and Get the Works

Get everything you need for complete threat management in one convenient package, including firewall, VPN, security subscriptions, and technical support with the Security Bundle from WatchGuard.

Each Security Bundle includes:

- Choice of WatchGuard XTM appliance (8 Series or 10 Series)
- spamBlocker
- WebBlocker
- Gateway AntiVirus
- Intrusion Prevention Service
- LiveSecurity<sup>®</sup> Service for 24/7 technical support, hardware warranty, software updates, and threat alerts

From initial purchase through ongoing security management, the bundle makes network security easier and more efficient. You get a complete solution at an excellent price, with no additional fees, contracts, or hardware to purchase.

### Got the Box? Get the Security Software Suite\*

If you already have a WatchGuard XTM appliance, turn it into a complete threat management solutions with the Security Software Suite. The Suite includes all the security subscriptions listed above, including LiveSecurity for expert guidance and support. A great deal when you buy together and save!

\*Security Software Suite does not include appliance.

One-year, two-year, and three-year subscriptions packages are available for the Security Bundle and the Software Security Suite.
