Networking Features														
Standard	Static & Dynamic NAT 1:1 NAT IPSec NAT traversal Policy-based PAT (port address translation)		Static routes Dynamic DNS VoIP & video conferencing support Policy-based & VPN traffic prioritization		Full marking support: Diffserv/IP services Quality of Service with 4 prioritization queues VPN failover		Static NAT Dynamic NAT 1:1 NAT		IPSec NAT traversal Policy-based NAT Static routes		VPN failover WAN failover			
Advanced OS	WAN failover, WAN failover to serial modem, outgoing load balancing						High availability (active/passive), traffic shaping and QoS, dynamic routing (OBG, OSPF), policy-based routing, port independence, enhanced WAN failover, multi-WAN load balancing, server load balancing, enhanced VoIP support, VLAN support							
Management Software	Stand-alone Edge appliances use intuitive web-based GUI Edge appliances used as endpoint devices on Core and Peak networks can be centrally managed using WatchGuard System Manager (WSM)						WatchGuard System Manager (WSM) WSM provides interactive real-time monitoring and logging for network-wide system status at a glance Includes drag-and-drop VPN creation and rich historical reporting							
Support and Maintenance														
LiveSecurity® Service	Initial 90-day or 1-year LiveSecurity subscription for hardware warranty with advance hardware replacement, free software updates, technical support with targeted 4-hour response time, threat alerts, education resources						Renewable in 1-year, 2-year, and 3-year subscriptions		Gold-level service available for 24/7 support with 1-hour response time					

*Throughput rates will vary depending on environment and configuration **Upgrade to Pro version of OS for advanced networking features and to have the maximum number of SSL tunnels available per model

WatchGuard Security Appliances

When companies need proven firewall and network security solutions, they turn to WatchGuard. We provide excellent reliability, service, support, and innovation for our customers, with a range of products to suit specific business requirements.

Firebox® X Peak™ Main Office/Headquarters - up to 1000 users

Firebox X Peak is the high performer of our Firebox X family of appliances, with up to 2.3 Gbps firewall throughput. All Peak models are powered by an advanced OS for complex networks, and deliver a superior overall solution that meets the security and reliability needs of SMEs with demanding network environments.

Firebox® X Core™ Small & Mid-Size Regional Offices - up to 300 users

Firebox X Core is our best-selling line of UTM appliances for SMEs, delivering robust security that can scale to meet growing demands. Customers can easily upgrade to a higher model in the line for more capacity and performance, move up to an advanced OS, and add powerful security subscriptions by purchasing simple license keys.

Firebox® X Edge Small & Branch Offices, Wireless Hotspots - up to 55 users

Firebox X Edge is a stand-alone firewall and VPN security appliance for small businesses, remote offices, and telecommuters. Available in both wired and wireless versions, it's the ideal endpoint solution for connecting a secure VPN tunnel back to a WatchGuard XTM, Firebox X Core, or Firebox X Peak appliance.

3G Extend Cellular Connectivity for WatchGuard Appliances

It's easy to add 3G wireless connectivity to a Firebox X Edge security solution to maximize equipment uptime and ROI. These handy accessories provide cellular connectivity that can be used for either primary or backup Internet services. They offer ultimate flexibility to meet specific needs by supporting more than 50 cellular modem cards and ISP provider plans.

WatchGuard® XTM 1050 Headquarters/Data Centers - up to 5000 users

The XTM 1050 is a high-speed network security appliance that delivers enterprise-grade performance and protection at an affordable price. 10 Gbps firewall throughput and 12 Gigabit Ethernet ports combine with advanced networking features including clustering and high availability (active/active) to handle high-volume network traffic securely.

WatchGuard® SSL Anytime, Anywhere Access Appliances

WatchGuard® SSL connects end users to more network resources and applications, with support for more platforms and mobile devices than any other remote access appliance in its class. Multiple authentication options make it easy for IT administrators to tightly manage access, while for end users access is a breeze.

The WatchGuard® Story

Since 1996, WatchGuard Technologies has provided more than half a million security appliances to hundreds of thousands of customers worldwide.

The award-winning WatchGuard Firebox X family of unified threat management (UTM) security appliances delivers the industry's best combination of strong, multi-layered security, high performance, and expert guidance and support. Our newest product – the WatchGuard® XTM 1050 appliance – provides fully extensible, enterprise-grade network security at an affordable price, while our WatchGuard®

SSL appliances allow secure remote access from anywhere, anytime. All products are backed by LiveSecurity® Service, a high-value support and maintenance program. The WatchGuard commitment to performance and value gives our customers enterprise-grade protection in a cost-effective, extensible solution.

Boost Protection in Critical Attack Areas

WatchGuard firewalls are built on robust "Layer 7" content inspection technology, which is fundamentally more secure than stateful packet filtering. Integrated security subscriptions deliver even more layers of protection, without requiring additional hardware purchases.

Subscriptions include:

- **spamBlocker** with virus outbreak detection
- **WebBlocker** for URL filtering on HTTP and HTTPS
- **Gateway AntiVirus** with anti-spyware
- **Intrusion Prevention Service** to block attacks that comply with standard protocols but carry malicious content

Buy the Bundle and Get the Works

The easiest, most cost-effective way to have complete network protection is with the UTM Bundle. An exceptional value, the Bundle includes:

- Choice of WatchGuard XTM or Firebox X appliance
- Full suite of security subscriptions*
- LiveSecurity Service* with 24/7 technical support

*One-year, two-year, and three-year subscription packages available

Easy to Upgrade

As business needs grow, it's easy to protect your security investment. Add new capabilities to enhance protection or upgrade to a higher model in the line for more performance or capacity using a simple downloadable license key.

Expert Guidance and Support

LiveSecurity Service from WatchGuard provides technical support with a targeted four-hour response time, and a hardware warranty that covers advance hardware replacement. It includes free software updates so code is always up to date. Concise threat alerts are delivered with clear instructions on how to reduce or eliminate new threats and link directly to vendor patches to save time. Ground-breaking security education tools include videos and podcasts. No other security vendor does as much to educate customers in the role of security-savvy network administrator.
