

WatchGuard to launch XTM appliance at Infosec

24 February 2009 - WatchGuard Technologies will be launching the first XTM eXtensible Threat Management appliance at Infosecurity Europe in London at the end of April. The new WatchGuard XTM 1050 represents the next generation of Unified Threat Management (UTM) devices and sets new standards for stronger zero-day protection, networking capabilities and management flexibility.

In addition to integrated firewall/VPN functionality with virus and intrusion blocking, WatchGuard® XTM extends security to provide spam blocking, spyware and bot protection, as well as URL filtering. It also includes enhanced support for technologies such as Voice over IP (VoIP), and offers inbound and outbound HTTPS inspection to increase content security.

The WatchGuard XTM 1050 is ideal for large enterprises, data centres and other large-scale high performance network environments with up to 5,000 users.

Also to be featured at Infosec will be WatchGuard's new stand-alone SSL VPN remote access appliances designed to give remote and mobile workers highly secure connectivity to their corporate networks. The WatchGuard SSL 1000 and WatchGuard SSL 500 offer an array of enterprise-class remote access features optimised for today's diverse range of mobile devices, platforms and network authentication options.

WatchGuard will be on stand G20 with its UK channel partner Wick Hill at Infosec in London, from 28-30th April.

About WatchGuard Technologies, Inc.

Since 1996, WatchGuard has been building award-winning unified threat management (UTM) solutions that combine firewall, VPN and security services to protect networks and the businesses they power. Our newest appliances represent the next generation of network security: extensible threat management (XTM). All of our solutions feature reliable, all-in-one security, scaled and priced to meet the security needs of every sized enterprise. Our products are backed by 15,000 partners representing WatchGuard in 120 countries and more than a half million signature red WatchGuard security appliances have already been deployed worldwide in industries including healthcare,

education, and retail. WatchGuard is headquartered in Seattle, Washington, with offices throughout North America, Europe, Asia Pacific, and Latin America.
