

Trade Up Comparison Guide: e-Series to Next-Generation Network Security

This table shows the enhancements in performance and capacity that e-Series customers gain when they trade up to WatchGuard's best-in-class Firebox and XTM products.

*UTM throughput numbers are not available for legacy e-Series appliances.

**FE refers to Fast Ethernet (10/100); GigE refers to Gigabit Ethernet (10/100/1000).

***Firebox M400/M500 models come with 6 built-in GigE ports, two SFP slots. Optional 1GigE fiber or copper. Firebox M440 appliances include 25 GigE ports (8 with PoE) + 2 10G SFP+.

† Firebox T30 and T50 come with 1 PoE (Power over Ethernet) port.
