

WebBlocker Server v1.1 Release Notes

Build Number	607978
Release Date	5 December 2019
Release Notes Revision Date	7 January 2020

Introduction

WatchGuard is pleased to announce the release of WebBlocker Server v1.1. This an important maintenance release for the on-premises server for WebBlocker with WebSense Cloud.

For a full list of the enhancements in this release, see [Enhancements and Resolved Issues in WebBlocker Server v1.1](#).

Upgrade to WebBlocker v1.1

Before You Begin

- WatchGuard recommends that you take a snapshot of your WebBlocker Server VM in VMware or Hyper-V before you start the upgrade process.
- Do not reboot the VM while a WebBlocker Server upgrade is in process.

Upgrade Instructions

Estimated time to upgrade: < 8 minutes

1. In a web browser, connect to your existing instance of WebBlocker Server at `https://<IP address of WebBlocker Server:4130>`, and log in.
2. Select **Administration > System Settings**.
The System Settings > Status page appears.
3. Click **Upgrade** and click **Browse** to select the WebBlocker Server upgrade file: `watchguard-webblocker_1_1_apr.tgz`.
4. Click **OK**. Wait for the upgrade to complete.
If the upgrade requires the WebBlocker Server services to restart, you will be redirected to the Log In page.

To verify that the upgrade was successful, make sure the **System Settings > WebBlocker System Information** shows that the **Version** is 1.1(596545).

Resolved Issues in WebBlocker 1.1

General

This release addresses the TCP SACK PANIC vulnerabilities CVE-2019-11477, CVE-2019-11478, and CVE-2019-11479. [FBX-16848]
