Release Notes for BorderWare Security Platform v8.1 Update 6

Software Build: 110330

Release Notes Revision Date: April 1, 2011

Overview

This update release resolves an issue with Kaspersky Anti-Virus where the update process cannot update virus patterns because of a license information error.

Installation Notes

This update requires the following minimum versions of software:

- BorderWare Security Platform 8.1 Update 5
- BorderWare Security Platform 8.1.4 Update 5

For base version BorderWare Security Platform 8.1, use update file: `sp81_update_6.pf`

For base version BorderWare Security Platform 8.1.4, use update file: `sp814_update_6.pf`

We strongly recommend that you save a copy of the current configuration and backup the system before you proceed with the upgrade.

To install the software update:

Backup the Configuration

1. Select **Administration > Backup/Restore > Backup and Restore**.
2. Select your backup method (**FTP**, **SCP**, or **Local Disk**), then click **Next**.
3. Select which information to back up. If you do not want to restore reporting data, clear the **Backup reporting db data** check box.

For the **FTP** and **SCP** methods, enter your server information.

4. Click **Next** to confirm your selections.
5. Click **Create backup now**.

Install the Software Update

1. Select **Administration > Software Update > Updates**.
2. If you use Security Connection, the software update already appears in the **Available Updates** section.

If you manually downloaded your software update:

- Click **Browse** and select the software update.
 - Click **Upload**.
3. In the **Available Updates** section, select the software update.

4. Click **Install**.
5. After you install the software update, you must restart the device.

Install the Software Update in a Cluster

1. On all devices in the cluster, stop message processing and change the cluster run mode to **Standalone** mode.
2. Install the update on the Primary, and then restart the system.
3. Change the run mode of the Primary system from **Standalone** back to **Primary** mode.
4. Install the update on the Secondary, and then restart the system.
5. Change the run mode of the Secondary system from **Standalone** back to **Secondary** mode.
6. Install the update on any Client systems, and then restart the system.
7. Change the run mode of the Client systems from **Standalone** back to **Client** mode.

Technical Assistance

For technical assistance, contact WatchGuard® Technical Support by telephone or on the Web at <http://www.watchguard.com/support>. When you contact Technical Support, you must supply your registered Product Serial Number, LiveSecurity key or Partner ID.
